

FIXING PN PROGRAM DEAUTHORIZING

Under some circumstances, a previously approved PN program which has passed the resource eligibility test will start showing up on PNED with ?'s in the Resource field. This usually happens when the mother's participation code is changed from DM to IN for a second pregnancy before the original UB is one year old.

When you see this problem, you'll be able to authorize the PN on PNIE, but if you enter through PNED, PACMIS will deauthorize the benefit. The immediate action would be to authorize on PNIE and press the F1 key which will process the screen and take you to a menu, avoiding PNED. If you find yourself in PNED, F9 out and you will not deauthorize the benefit.

If you would like to resolve the problem of the ?'s on PNED, please follow these steps:

1. Determine what is the current Month-Determined- Eligible (MDE). Go to the most current PNIE screen. Find the MDE in the top right. Remember this month.
2. Undo the current MDE. (You must do this to allow PACMIS to recalculate PNRD in the month with the ?'s problem..) Go to the ETRC screen for the Month-Determined-Eligible and code the IN person, probably the UB, with Residence "NR". That will cause PACMIS to fail the PN eligibility for the month.
3. Go to PNIE for the original MDE and press ENTER. This will undo the MDE.
4. Process the PNRD screen for the month(s) with ?'s. That will change the ?'s to PASS.
5. Return to ETRC screen for the original MDE and change the "NR" residence code back to "RE".
6. Go to the PNIE screen for the MDE, enter your PCN and press ENTER. This will reestablish the MDE.
7. Check to see that this reset the MDE by going back to PNIE. The MDE will appear again in the top right area of the screen.

SCREEN SEQUENCE

1. Determine MDE
